DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. If the upper limit of the range of impedances has substantially the same magnitude as the lower limit of the range of impedances, does the concept of a range truly apply? Clarification is required.

Allowable Subject Matter

Claims 1-3 and 5-58 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Estes (3,601,126) discloses an HF electrosurgical apparatus with an indifferent electrode (100) in series with an inductor (Figure 1), but lacks the disclosure that the indifferent electrode has a bulk impedance sufficient to limit the density of the electrosurgical current to safe levels; Goble (6,547,786) discloses an electrosurgical system and instrument with a return electrode in series with an inductor (Figure 4), but lacks the disclosure that the indifferent electrode has a bulk impedance sufficient to limit the density of the electrosurgical current to safe levels; and Jarrard et

al. (US 2005/0101947 A1) disclose an apparatus for dispersing current flow in electrosurgery by adjusting and balancing the current through two of more dispersive electrodes to enhance prevention of unwanted patient burns.
